To the Citizens of Northumberland:

This year I expect that again you will be faced with an increase in property taxes. However it is you, the voter, who will make the final decision.

In 1958 I believe the most important step taken was the reduction of the debt of the town. The amount of \$35,392.24 was paid on notes and new equipment. If this program of debt reduction can be maintained for a period of two years, the town will be free of debt; plus the town could appropriate over \$5,000 each year for new improvements without increasing the total town payments.

At town meeting if there is anyone who feels that I can not provide enough information concerning an article, they may request that the article be taken up at a later date. Town meeting can be adjourned to another day when the answers can be given.

I have made a few changes in the Town Report in order to show more clearly how the tax rate is derived. With a few appropriations I have broken them down into unit costs. These changes might be a little confusing at first, but if there are any questions concerning the Town Report or the warrant I will welcome your inquiries.

Respectfully

KENNETH D. BOEHNER
Town Manager

HEALTH OFFICERS REPORT FOR 1958

The following communicable diseases were reported to the Health Officer for the year 1958: scarlatina, 8; mumps, 5; influenza, 2; streptococcal sore throats, 120; chicken pox, 9; German measles, 1; measles, 12; scarlet fever, 31; gonorrhea, 1; meningitis, 1; bronchopneumonia, 4; scabies, 7; pediculosis, 1; impetigo, 14; ringworm, 4; infectious hepatitis, 1; trenchmouth, 2.

There was a very high incidence of streptococcal infections, namely scarlet fever, scarlatina and streptococcal sore throats, during the latter part of the year. This reached almost epidemic proportions. The last previous epidemic was in 1948. Patients having these illnesses should have medical attention and antibiotics to prevent the more serious complications, including rheumatic fever and Bright's disease. Other diseases ran from low to average.

Water samples taken from Northumberland and Groveton indicate reasonable control of pollution. Of 22 samples taken in Groveton, 18 were satisfactory and 4 were slightly contaminated. Of 3 samples from Northumberland, 1 was satisfactory and 2 showed slight contamination.

There was a small number of complaints registered with the Health Officer concerning improper garbage disposal, etc., which were investigated.

Sincerely,

ROBERT I. HINKLEY, M.D.

Health Officer

To the Citizens of Groveton:

During the year 1958, 39 visits were made to the town. Two Salk Vaccine Clinics, sponsored by the N. H. State Department of Health, in cooperation with the local School Nurse, and the District Nurse, were held, and 264 children were immunized. In the Spring the Triple Toxoid Clinics were held and 477 children were immunized, 114 children started and finished the series and 138 children were given Booster injections. This was a well attended series of Clinics, and the Community should now be immunized. One child attended the Orthopedic Clinic held in West Stewartstown in May, and several children are attending the Orthopedic Clinic in Berlin.

It has been a pleasure to work with the Citizens of Northumberland, and at this time I would like to thank them for their cooperation.

Respectfully submitted,
ELEANOR KENNEY, R.N.
Public Health Nurse, Coos County
New Hampshire State Dept. of Health
